

# ECONOMICS (B.A.)

---

**This program is on Administrative hold as of Fall 2024.  
No new students may enroll at this time.**

In addition, majors complete three additional economics electives offer at the 300-level. Further, Econometrics (ECON-420 Econometrics) is required, and students are advised to take during their final year of study. Employers value this skill, and graduate programs in economics will expect it. Finally, each major must complete one course in introductory statistics (MATH-141 Introductory Statistics, PSYC-251 Psychological Statistics, or MGT-140 Quantitative Decision-Making) as well as either Precalculus (MATH-112 Precalculus) or Calculus (MATH-211 Calculus I).

If you plan to continue into any graduate program, it is strongly suggested that you meet with a faculty member by your junior year to ensure that you are adequately prepared. Statistics is the only math preparation required if you intend to pursue an M.B.A., law school, or a graduate program in a field other than economics. However, a graduate program in economics will require calculus and linear algebra as well.
